

The background of the top section is a photograph of a residential community. It shows a row of modern, two-story houses with light-colored siding and dark roofs. In the foreground, there is a black metal gate with brick pillars. The word 'RESIDENTIAL SOLUTION' is overlaid in large, white, bold letters.

# RESIDENTIAL SOLUTION

## HOW CAN YOU PROTECT TENANTS IN RESIDENTIAL COMMUNITIES?

Check out LILIN's residential solution that provides an all in one home security system with access control, perimeter detection and remote access to ensure residency safety.

### GATE CONTROL

7 Series cameras with EDGELPR license uses license plate recognition to filter entry through gate with allowed list, denial list and visitor list. This will limit outsiders' access and increase safety precautions for the community. With this AI technology, residents and their guests will be able to enter the communities easily without gate remote controls.

### PERIMETER DETECTION

P2 Series cameras with IVS 2.2 license can detect humans and vehicles around gated communities and alert gated community management of any suspicious activities. Management can then notify law enforcement. LILIN cameras and network video recorders have 24/7 continuous recording for 4 years, ensuring that all footage is secured to cooperate with law enforcement.

### REMOTE ACCESS

A guard shack can be placed near the gate and remotely access multiple LILIN cameras using our remote client. Gated communities can lower labor costs for surveillance by having one guard to monitor multiple areas using the multi-channel compatible NAV servers.

# RESIDENTIAL APPLICATIONS

1

## VIVIDKNIGHT TURRET CAMERA | E6W4352A

VIVIDKNIGHT cameras provide 24/7 full color surveillance making it easy to surveil gated communities during the night time. Full color allows you to see color images in total darkness and to identify distinguishing characteristics of intruders.

2

## PROGRAMMABLE SMART I/O BOX | DB052E

I/O Box receives signals from LILIN cameras with EDGELPR license (license plate recognition) to allow entry through gate with allowed list, denial list, and visitor list. I/O box allows residents to access gate without a remote control.

3

## STARVIS 4K P-IRIS AUTO FOCUS IR AI SMART IP CAMERA | Z7R8182X3-P

LILIN smart IP camera paired with EDGELPR license uses license plate recognition to control gate access. LILIN IP camera paired with EDGE-FLOW license can detect people trying to climb over fences and alert management.

4

## FISHEYE CAMERA | F2R36C2IM

Fisheye camera provides 360 detection covering all angles for surveillance in gated community.
